ABOUT: Full-Stack Developer with experience in developing SaaS, enterprise systems, and interactive applications using TypeScript, React, and Next.js. I have worked on platform development in the healthcare, fintech, blockchain, gaming, and business management sectors, building scalable and modular applications with a focus on performance, user experience, and architectural quality. I have experience in creating digital products from conception through to production deployment, including complex systems such as hospital platforms, commercial ERPs, and interactive games. I also have experience with agile methodologies and AI-assisted development to accelerate prototyping and improve productivity in the development cycle.

PROFESSIONAL OBJECTIVE: I work as a Software Developer, contributing to the development of scalable and innovative digital products by applying my expertise in full-stack development, systems architecture, and modern user interfaces to drive technical impact and business value. I seek to collaborate with teams that value engineering best practices, technological innovation, and the creation of high-quality solutions.

COMPETENCIES:

LANGUAGES & TECHNOLOGIES *TypeScript, JavaScript, Python, Java, C*

FRONT-END *React, Next.js, TailwindCSS, GSAP, Preact, Flutter, React Native*

BACK-END *Node.js, NestJS, APIs REST, Supabase*

PRODUCT DEVELOPMENT SaaS, SPAs, modular architecture, interactive interface design, perfomance-oriented development

DATABASES *PostgreSQL, Supabase, MySQL, MongoDB*

BLOCKCHAIN *Solidity*, Smart Contracts, integrations between blockchains

GAME DEVELOPMENT *Godot*, interactive system design, game theory and logic

TOOLS *Git, React Tools, Postman, Atlassian, Cursor*, IA-assisted development, agile metodologies (*Scrum*)

EDUCATION:

Bachelor's Degree in Computer Science (incomplete) CESAR School – Recife, PE

Bachelor’s Degree in Game Design (in progress) Anhembi Morumbi University – São Paulo, SP

MOST RECENT CERTIFICATIONS, COURSES, AND TRAINING:

FreeCodeCamp – Web Development and *JavaScript* Courses

Video Courses – Training in Programming and Web Development

Independent courses (Udemy/Alura) in: *JavaScript, React*, and Full-Stack Web Development

---

RELEVANT PROJECTS:

Maid System – Operational Management Platform

A web-based system for managing teams and operations in cleaning service companies.

Key features:

- Task and team management
- Operational monitoring dashboards
- Organization of services and work routines

Elo Health – Hospital Management Platform

SaaS system for hospital management with multiple operational modules.

Key features:

- Patient intake and registration management
- Medical history and outpatient care records
- Surgical procedure management
- Hospital pharmacy management
- Modular structure designed for scalability

Latsys – Commercial ERP System

An enterprise system for commercial and logistics management used by companies in the industrial sector.

Key features:

- Product, order, and inventory management
- Pre-order system with commercial validation
- Generation of operational and tax reports
- Data export for integration with the Magis TI system
- Generation of reports used in administrative and legal processes

Technologies used:

Next.js, TailwindCSS, ShadCN, Zustand, Supabase

PROFESSIONAL EXPERIENCE

Software Developer

Horizonte Studios (formerly Future Front)

Jan 2023 – Present | Recife, Pernambuco

Working as a freelance developer creating web applications and SaaS platforms.

Main responsibilities:

- Development of modern SPAs using React, Next.js, and TypeScript
- Architecture and implementation of scalable SaaS systems
- Development of enterprise systems for various industries
- Creation of responsive and high-performance interfaces
- Participation in all stages of the software development lifecycle

Frontend Developer

SGA – Software Gaming Architects

Jul 2025 – Dec 2025 | Recife, Pernambuco

- Development of administrative interfaces for casino management systems
- Implementation of front-end features integrated with APIs
- Development of modern interfaces focused on usability and operational efficiency

Game Developer

Rainbet

Jul 2024 – May 2025 | Remote

- Development of a casual casino game using TypeScript, Tailwind, and GSAP
- Implementation of an automated betting system (autobet)
- Creation of a modular architecture for UI components
- Development of a responsive UI for multiple devices

Software Developer

AORO

Oct 2023 – Feb 2024 | Remote

- Development of modern web applications using Next.js
- Contribution to a fintech platform based on physical assets
- Implementation of interfaces focused on performance and user experience

Full-Stack Developer

Lovecrypto Inc

Sep 2022 – Jan 2024 | Hybrid

- Web application development using React and Next.js
- Smart contract development in Solidity
- Implementation of KYC and compliance-related features
- Participation in Scrum teams with iterative deliveries

Game Developer

Lucid Dreams

Jun 2022 – Jul 2023 | Recife, Pernambuco

- Backend development with NestJS
- Contribution to game design and the creation of a narrative universe

Frontend Developer

Novo Atacarejo

Jan 2022 – Jun 2022 | Recife, Pernambuco

- Development of an institutional landing page using Preact
- Creation of internal applications using Flutter
- Integration with existing PHP- and .NET-based systems

Full-Stack Developer

Gowdock

Mar 2020 – Dec 2021 | Recife, Pernambuco

- Web application development using React
- Mobile app development using React Native
- Participation in an agile team using the Scrum methodology
